

Internship in the IBM Global Business Services - BI/DW

Think you know a better way of doing things? “International Business Machines” may not say it all, but IBM does a lot. We’re still leading the world with best-in-class technology, but we’re the world’s largest business consultancy too. With operations in 160 countries across 17 industries, you will make a real impact—by solving complex business issues for the world’s leading clients, and by giving them an advantage in the market.

Job description

This position involves working within a team dealing with many aspects of the analysis, development and maintenance of Business Intelligence and Data Warehousing for IBM customers.

This job covers different areas from business analyze, model design, development of back-end (create Informatica Mappings, ETL processes) and front-end (Create Reports, Cubes, Dashboards, Universe Architectures), to testing, writing related documentation (Design Spec, Unit Test, Business Requirements) and creating the metadata.

The candidate must be able to identify proactively, together with the team, any shortcomings in performance and propose solutions for their correction. Therefore, communication/interpersonal skills within the team, basic business knowledge and strong analytical thinking are preferred.

You will need to show us that you’ve got...

- Strong knowledge about relational database concepts (working with at least one major RDBMS product: Oracle , IBM DB2, MS SQL Server);
- Experience with Cognos, Business Objects or any other BI Reporting Tool
- Experience with ETL Tools (Informatica, DataStage), Data Warehousing and shell scripting
- Knowledge about Data Architecture and Modeling
- Understanding the business terms and processes
- Fast learning and willingness to constantly improve the knowledge base.

And we require:

- Pre-University qualification
- English: Fluent

Why join us?

Here’s a few good reasons why:

- Interaction with IBM thought leaders to gain insight into industry and businesses ranging from large enterprises to start-up companies
- Exceptional on-the-job training
- Potential full-time career opportunities
- Ongoing learning and development opportunities
- Supportive work environment

Start showing us what you can do!
